

Elevator Light Panel

Product Model: AF2610

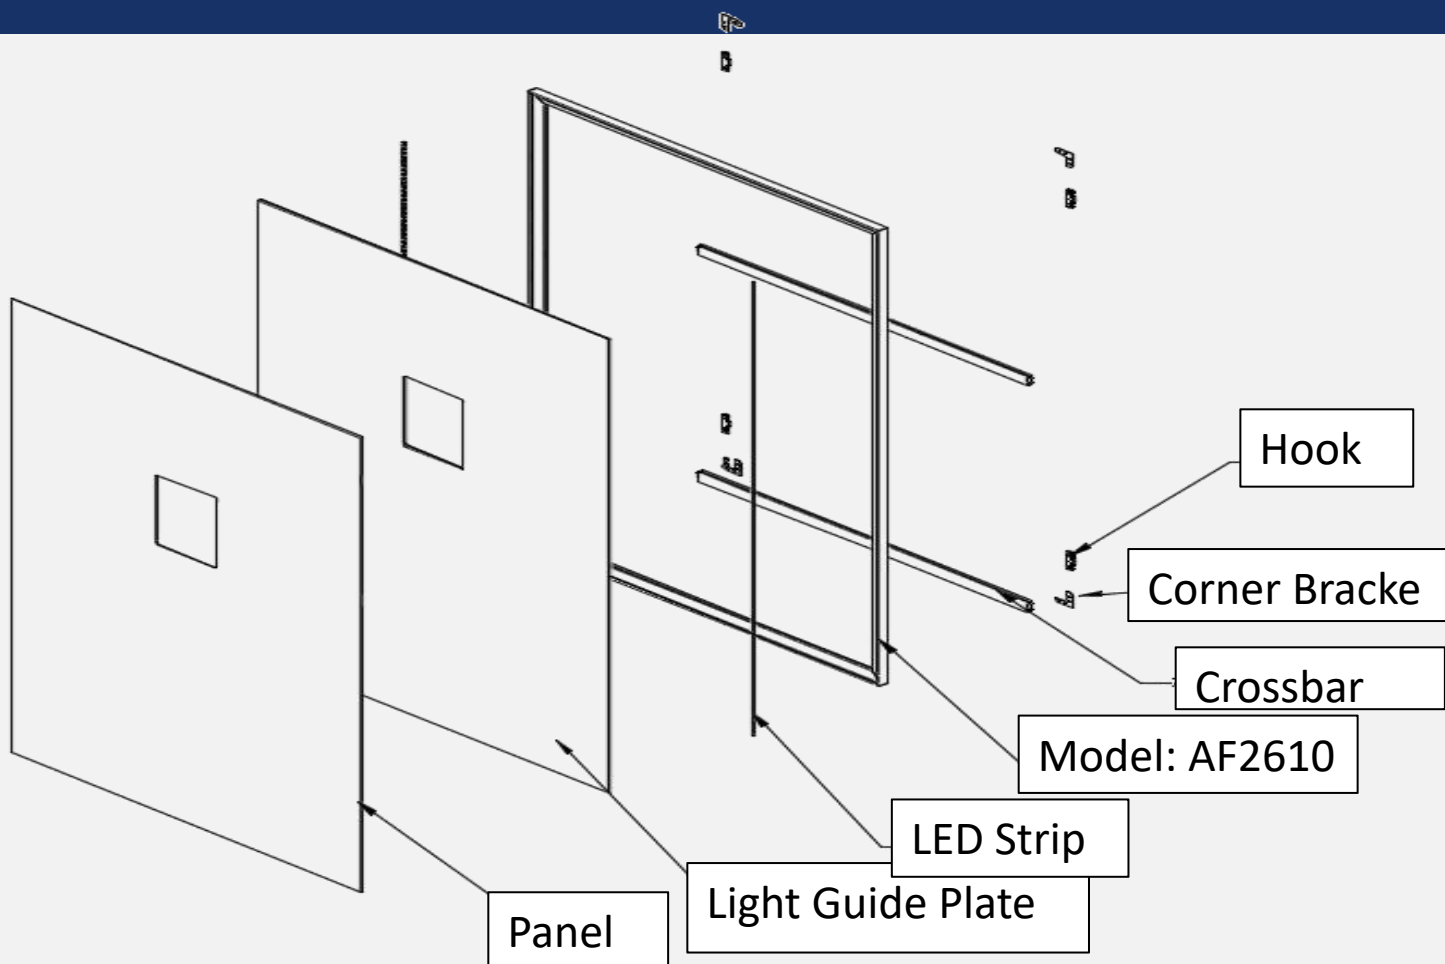

- ◆ The elevator light panel features an innovative design composed of a custom profile frame, light guide panel, LED strips, and a backboard. The profiles connect with L-shaped brackets and are reinforced with crossbars and sliders for a secure fit.
- ◆ The panel utilizes dual-color temperature LED strips or RGB LED strips. Through different color, pattern, and shape designs, it can add a unique artistic ambiance to the elevator car, enhancing the overall aesthetics and comfort. This design also increases the sense of space within the elevator, improving the passenger experience.

Product Characteristics

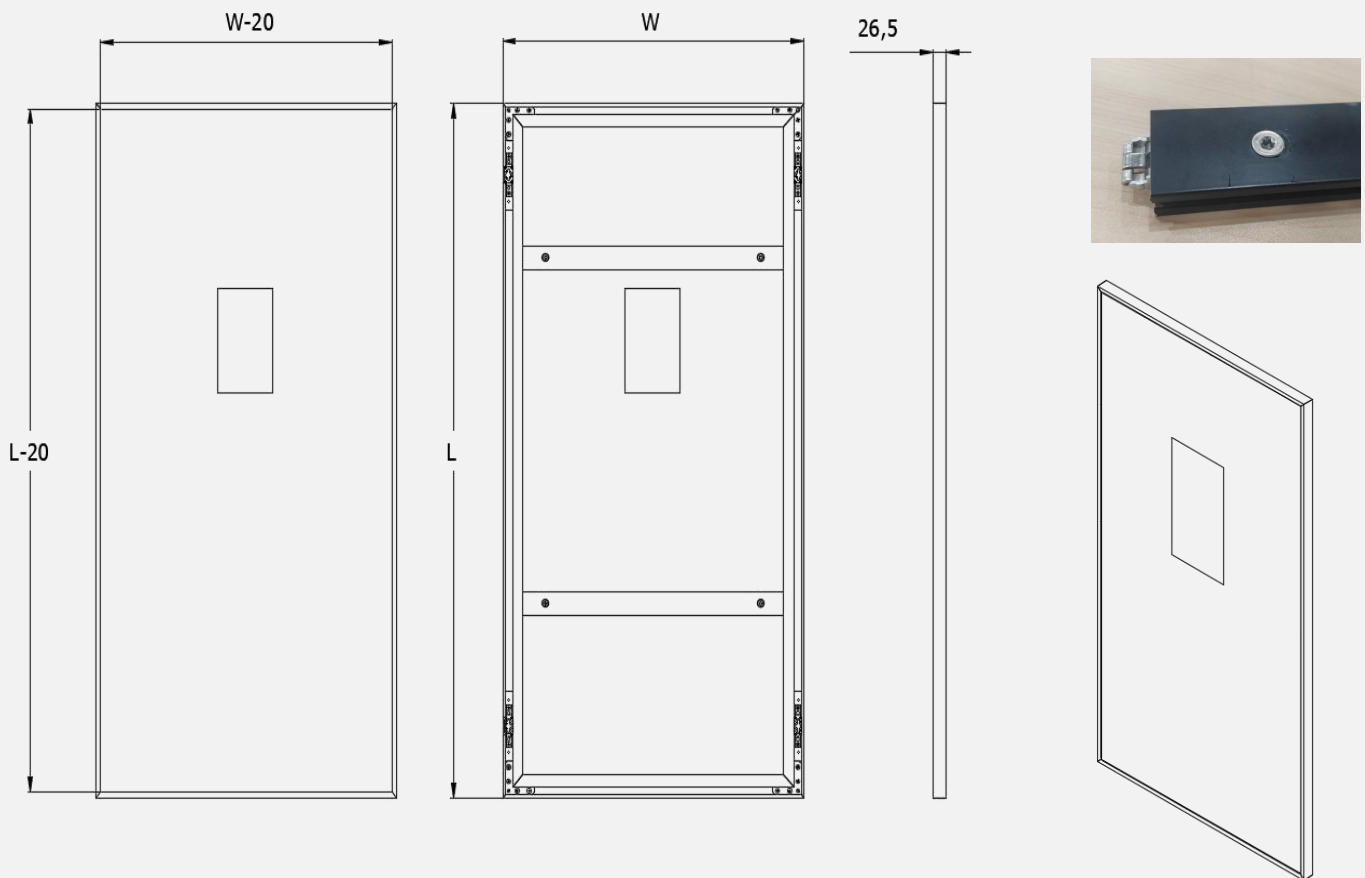

- The outer frame is made of high-quality aluminum with an anodized surface finish.
 - The panel uses a light guide plate for low power consumption and uniform brightness.
 - The constant voltage LED strips, combined with the aluminum profile, ensure efficient heat dissipation, extending the product's lifespan.
 - Various LED strips are carefully designed to meet different lighting needs. ;
- The outer frame is connected using corner brackets and reinforced with crossbars at the back.
 - Adjustable hooks on the back of the frame make installation simple and convenient.
 - The image is UV printed and can be customized with various patterns according to requirements.
